PROFESSIONAL SUMMARY

Software Developer with production experience spanning full-stack development, cloud engineering, and enterprise infrastructure. Builds and deploys real systems — from internal operational tooling and Proxmox virtualization on enterprise hardware to real-time monitoring stacks — with hands-on exposure to live ISP network operations including VLANs, Layer 2 and 3 switching, DNS, IP routing, and traffic monitoring in a production environment. Backed by a full-stack & cloud engineering internship, 10+ freelance project deliveries across mobile, web and CMS platforms, and a Cum Laude graduate (2025) with multiple competition wins.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, PHP, Dart, HTML/CSS, VB.Net

Frameworks & Libraries: React, React Native, Next.js, Node.js, Express, Tailwind CSS, Bootstrap, Flutter, Redux, GSAP, Framer Motion, ShadCN

Databases: MySQL, PostgreSQL, MongoDB, Firebase, Supabase

Infrastructure & DevOps: Proxmox (bare-metal), Linux server administration, CI/CD basics, Cloud Deployment, AWS

Monitoring & Observability: Grafana, Prometheus, network health dashboards, traffic analysis

Networking & Security: VLAN configuration, DNS, firewall management, IP routing, network device administration

Tools & Platforms: GitHub, GitLab, Vercel, XAMPP, VS Code, AWS Cloud Practitioner

Development Practices: Agile, REST APIs, TDD, Unit Testing

PROFESSIONAL EXPERIENCE

Software Developer | **KCAT Inc. (ISP)**

Oct 2025 - Present

Kabankalan City, Western Visayas, Philippines • Full-time, On-site

- Architected and deployed a real-time Network Monitoring System (NMS) with Grafana & Prometheus on a bare-metal Proxmox (Cisco HyperFlex & HPE) — full lifecycle from setup to production rollout.
- Built an internal web application for operational management: user connectivity control, log monitoring, and profile administration
- Works alongside network engineers in a live ISP environment — daily exposure to VLAN configuration, DNS, IP routing, network layers operations, traffic monitoring and suspicious activity tracking.
- Developed a QR Code Generator for the sales department ; manages ongoing server maintenance, performance oversight, and end-to-end IT support.

Full-stack Developer & Cloud Engineer | **Spring Valley Tech Corp.**

Feb 2025 - Jun 2025

Bago City, Western Visayas, Philippines • Internship, On-site

- Rotated across four engineering tracks — Software Development (Python/Flask), Cloud Engineering (AWS), Frontend (React Native), and Full-Stack — delivering real sprint output throughout.
- Built and integrated API endpoints, conducted API testing, and contributed to development implementation within a collaborative Agile-team across a 5-month engagement.

Freelance Developer | **Self Employed & Freelance Team**

Jun 2024 - Present

Remote • Full-stack (Mobile, Web and CMS)

- Delivered 5+ client projects across mobile (React Native, Flutter), web (Next.js, PHP, React), and CMS (WordPress and Framer) — end-to-end from design through QA and deployment.
- Shipped cross-platform mobile apps achieving 100% responsive UIs and improved API response times by 30% through optimized Firebase integration.
- Redesigned WordPress client sites (Goranow & others) increasing page load speeds by ~40%; managed client communication, requirements gathering and design approvals.

KEY PROJECTS

Network Monitoring System (NMS) — Grafana, Prometheus and Loki (Proxmox)

- Full production deployment at KCAT Inc — alerting pipelines, real-time dashboards, and anomaly detection replacing all manual network inspection

SirenApp — Mobile Emergency Application — *React Native, Firebase*

- Developed and deployed using React Native and Firebase, supporting both iOS and Android with a fully responsive interface.
- Implemented real-time location tracking, secure Firebase authentication, and cloud media uploads for rapid emergency coordination.

Smart AR Glasses — Assistive Tech Prototype — *Raspberry Pi, Python, TensorFlow*

- Developed and deployed using React Native and Firebase, supporting both iOS and Android with a fully responsive interface.
- Implemented real-time location tracking, secure Firebase authentication, and cloud media uploads for rapid emergency coordination.

EDUCATION & INFORMATION

B.S Information Technology — Southland College

2021-2025

- Cum Laude (2025), Exemplary Awards for Technology & Innovation (2025), 4th Place PITCH UP Solutions, Region 6 (2025)
- FBC Web Design Contest Champion (2024), WVSU Web Development Contest Champion (2023), IT DAY Southland College Web Sprint Design Champion (2023), SECSA Week Web Development Contest 2024 2nd Place (2024), SECSAFEST Web Development Sprint 2025 1st Place (2025), SECSA 2026 - IT Day Web Design Compeition Judge (2026
- Certifications: AWS Cloud Practitioner Essentials
- Languages: English (Professional), Filipino (Native)
